How do you study for teas test

No matter how old you are, there's always room for improvement when it comes to studying. Whether you're taking the biggest exam of your life or you know your teacher or professor is going to give a pop quiz soon, efficient studying is a great way to be prepared. Create a Routine One of the best things you can do for yourself, whether you're in fifth grade or college, is to make studying a habit. One helpful way to do that is to find a way to incorporate it into your daily routine at the same time every day. Perhaps it's after dinner or right when you get home from school. Find the time that works for you, and make yourself sit down to study and handle any homework you have at that time every day or on as many days as possible. Break It Up Everyone's been there. You wait until the very last minute to study, and you do it all in one sitting. Not only is it exhausting, but you probably also don't even remember half of what you study. This is why it can be better to break it up and do a little bit each day. If you have a big project coming up in a few weeks, break it down into steps, and take on one of the steps every other day until everything is complete. If you have plenty of reading to do, break it down into chapters or pages, and read one section each day. Get Some Sleep While it can be tempting to stay up all night studying before a big exam, you're better off getting sleep. Your brain and memory function better when you're rested, so you can retain more of the information and do better on your test. If you didn't get a full night of sleep, consider napping briefly during the day to help catch yourself up on sleep. Clear Your Mind Before you sit down to study, make sure you have a clear mind and that you're not focused on something else. Take a walk, listen to some music, read a book or do some stretches. Try meditation. Do whatever it takes to get your mind in the right mood for study time. Be sure to take breaks while you study too. Resting for five minutes every 30 to 60 minutes may help you retain the information. Create the Right Environment Finally, create a good study environment. It can be hard to pay attention when the TV is on or when you're constantly receiving texts from friends. Turn off your devices. If you don't do well with quiet, use a fan for background noise, or turn on a radio. You may find it more effective to study to music that doesn't have lyrics. Make sure you're comfortable and organized. You'll also want to make sure you have plenty of water and a few healthy snacks on hand if you'll be studying for a while. MORE FROM QUESTIONSANSWERED.NET Summary: If you are applying to Mercer University's 12-month ABSN track, you might wonder: Is the TEAS test challenging? It depends on how much effort you put into test preparation. You should begin studying for the TEAS six weeks before test day by brushing up your reading, math, science, and English skills and completing free online TEAS practice tests. Before you apply to nursing school, it's important to be prepared. The Test of Essential Academic Skills (TEAS) is an admissions requirement for Mercer University's second degree Accelerated Bachelor of Science in Nursing (ABSN) track and helps us gauge your level of academic readiness for nursing school. For admission to Mercer's 12-month ABSN track, applicants must score 76% or higher on the exam. It is a score requirement that reflects our commitment to helping students build a strong foundation for nursing school success. Administered by ATI Nursing Education, the TEAS is a standardized test that focuses on your comprehension of fundamental academic skills in reading, math, science, and English and language usage. Is the TEAS test hard? It depends. Passing the TEAS correlates with the time and effort you are willing to devote to your test preparation. And given that nursing school is competitive, the higher your TEAS score, the stronger your application will be. Take Note Mercer's 12-month ABSN track in Atlanta, Georgia is a second-degree option for individuals with a non-nursing bachelor's degree. What is on the TEAS Test? The ATI TEAS is one of the first steps toward a bright future in Mercer's ABSN track and the nursing profession. The test provides our nursing faculty with useful information regarding your readiness for an accelerated nursing education. By knowing your academic strengths and weaknesses, we can provide you with the best possible support during nursing school. The test includes 170 multiple-choice questions—20 of which are sample questions—that cover the skills needed to succeed in nursing school and has an overall time limit of 209 minutes. Below is a breakdown of what is on the TEAS test. TEAS Section 1: Reading Registered nurses frequently send and receive documentation while on the job. Therefore, it is necessary to be able to convey, read, and interpret different types of information. In this section, you will have 53 questions to answer within 64 minutes. Six will be sample questions that do not contribute to your score. Questions fall into three categories: Key ideas and details Craft and structure Integration of knowledge and ideas TEAS Section 2: Math Solid math skills are essential in the nursing profession. Nurses work with numerical information daily, from taking and documenting patient vitals to calculating and administering medication dosages. In this section, you will have 36 questions to answer within 54 minutes. Four will be sample questions that do not contribute to your score. Questions fall into two categories: Numbers and algebra Measurement and data TEAS Section 3: Science Having a keen understanding of science is vital to delivering quality patient care. For instance, understanding the biological processes of the human body are key to restoring balance in patients. In this section, you will have 53 questions to answer within 63 minutes. Six will be sample questions that do not contribute to your score. Questions fall into three categories: Human anatomy and physiology Life and physical sciences Scientific reasoning TEAS Section 4: English and Language Usage Whether you are a nursing student or a practicing registered nurse, success relies on your ability to communicate clearly and effectively in various situations. In this section, you will have 28 questions to answer within 28 minutes. Four will be sample questions that do not contribute to your score. Questions fall into three categories: Conventions of standard English Knowledge of language Vocabulary acquisition A lot of career changers apply to Mercer's second degree ABSN track. If you plan on transitioning into the nursing profession, the TEAS is the perfect opportunity for you to refresh your academic skills and position yourself for a successful learning experience. How to Prepare for the TEAS When it comes to TEAS test prep, we recommend that you begin studying at least six weeks before your scheduled exam date—and you do not have to prepare alone. Mercer offers a free weekly TEAS preparation workshop for prospective ABSN students. During the workshop, our academic success coaches will discuss what you can expect on the exam as well as help you create a personalized study plan. We also provide a free TEAS study guide. Take advantage of our free TEAS prep workshop for prospective ABSN students. Free TEAS Practice Tests As part of your TEAS preparation, we encourage you to take advantage of ATI study packages, as well as supplemental online and print resources, including: kaptest.com mometrix.com nursehub.com study.com teaspracticetest.com test-guide.com Many of these websites provide free TEAS practice tests. When taking these tests, make sure the material covers the sixth edition of the TEAS exam, or TEAS 6. Helpful Hints As you begin taking your TEAS practice tests, we recommend this approach: Take your first practice test as if it were an open-book exam without a time limit. Take your second practice test as if it were an open-book exam with a time limit. Take several practice tests as if you are taking the actual exam. TEAS Test Tips If you need guidance on how to study for the TEAS test, here are some helpful tips and test-taking strategies that will prepare you to take the exam with confidence. Starter Tools and Tips Begin your TEAS prep six weeks before you take the exam. Maintain a consistent study routine to remain on track. Develop efficient study habits based on how you learn best. Focus on the subjects you find most difficult first. Sign up for Mercer's free TEAS preparation workshop. Get a copy of ATI TEAS 6: Secrets Study Guide. Consider downloading the Pocket Prep phone app. Join the ATI TEAS 6 study group on Facebook. Make use of the online Anki flashcard app. Reading Section Tips You have 64 minutes to complete 53 questions. Many of the questions in this section require you to read long passages of information. To complete the section efficiently, it is helpful to read and understand the question first, so you know what to look for when reading the corresponding passage. You will encounter different passages written in narrative, expository, descriptive, and persuasive forms. You will need to identify what type of passage you are reading. As you study, try to identify unique traits for each writing form. For example, a narrative form has characters and a plot, whereas an expository form focuses on facts. Here is a practice question pulled from Kaplan Test Prep. Melvil Dewey developed and introduced his eponymous Dewey Decimal System for book classification and arrangement in 1876. Before that, libraries arranged books in order of when they were acquired. Dewey's system arranged titles into 10 classes, with 10 divisions each, with each division having 10 sections. The first set, 000, includes computer and informational volumes. The 300s group encompasses the social sciences, and the last category, the 900s, identifies history and geography. For mathematics, under the general class of 500, 516 denotes geometry, and 516.3 is specific to analytic geometries. Though the Dewey Decimal System is still in use by many general libraries, the Library of Congress Classification is preferred by many research and academic libraries. In this system, general works fall under class A, with yearbooks subclassified as AY and dictionaries under AG. According to the passage, in the Dewey Decimal System, all books are categorized into: one general class, one division, one section, one general class, including AC. Answer: one general class, one division, and one section. Math Section Tips You have 54 minutes to complete 36 questions. Most of the questions in this section will involve algebraic and numerical properties. As you study, be sure to spend time practicing word problems, ratios, rational numbers, proportions, percentages, and arithmetic. It helps to remember that fractions, decimals, and percentages are different ways of saying the same thing (e.g., 25/100, 0.25, and 25%). Also, if you need help remembering the order of operations, use the acronym PEMDAS to jog your memory. Parentheses Exponents Multiplication and Division Addition and Subtraction The ordering of these letters represents the order you must use to solve different parts of a math problem—expressions in parentheses come first and addition and subtraction come last. If you cannot remember the acronym PEMDAS, try the mnemonic device: Please Excuse My Dear Aunt Sally. In this section, you will also encounter questions that involve various units of measurement, different types of data presentations, and geometric and statistical properties and principles. Before the exam, be sure to brush up on the U.S. standard measurement system (pounds, inches, feet) and the metric system (grams, kilos, liters) and how to convert between the two. Here is a practice question pulled from Kaplan Test Prep. Devon is making table runners for his niece's wedding. The short tables are 6 feet (ft) long, and the long tables are 10 ft long. Each runner will overhang its table by 8 inches (in.) on each end. Devon was told there will be 12 small tables and twice that number of long tables. How many total yards (yd) of fabric will he need to make the table runners, assuming no waste? (Note: 12 in. = 1 ft and 3 ft = 1 yd.) 104 yards 110 yards 114 yards 120 yards Answer: 120 yards You can use a calculator on the TEAS—just not your own. If you are taking the print exam, the testing site will provide you with a calculator. If you choose the online version of the exam, you will use the digital calculator on the computer. Science Section Tips You have 63 minutes to complete 53 questions. Most of the questions in this section involve human anatomy and physiology. Be sure to spend time studying the different systems inside the body (e.g., cardiovascular, respiratory, immune, skeletal) and how they function independently and in conjunction with one another. Also, take time to review the basics of life and physical sciences, such as atom structure, DNA, and solids, liquids, and gases. The scientific reasoning category in this section tests your basic scientific knowledge, so be sure to know how science works as a process. Here is a practice question pulled from Kaplan Test Prep. Which of the following controls the flow of chyme from the stomach into the small intestine? Pyloric sphincter Esophageal sphincter Ileocecal valve Epiglottal flap Answer: Pyloric sphincter English and Language Usage Tips You have 28 minutes to complete 28 questions—the final and shortest section of the exam. With the finish line in sight, it is easy for test-takers to want to hurry through this section. Be sure to give it the same time and dedication as the other three. Most of the questions in this section involve vocabulary acquisition and will test you on your ability to define words based on their context. There will also be questions that put your spelling skills to the test. We recommend reviewing a list of the most commonly misspelled words (e.g., vicious, vacuum, and embarrass) as part of your study regime. Here is a practice question pulled from Kaplan Test Prep. Nichelle and Denise hosted _____ yearly birthday bash in Las Vegas. Answer: their TEAS Registration Process As a Mercer ABSN applicant, you can take your TEAS exam at our ABSN Learning Site—a designated PSI Testing Center. We offer two proctored test sessions per week. To register for an upcoming session, contact your Mercer enrollment counselor and ask for a registration form. After completing the form, email it to MercerABSNet@absn.mercer.edu for processing. Within 48 hours of taking the exam, you will have access to your TEAS score. Your score reports are official and automatically added to your Mercer ABSN application file. If your TEAS composite score is below 76%, you may retake the exam three times within 12 months. We recommend waiting at least one month between retakes so that you can work on the skills that need the most strengthening. And remember, Mercer is here to support and guide you through the process. So, anytime you have a question or concern about the exam, please feel free to contact your enrollment counselor. Prospective Mercer ABSN students can take the TEAS exam at our ABSN Learning Site. After Passing the TEAS Once you earn a composite score of 76% or higher on the TEAS and submit your application for Mercer's ABSN track, you will receive an admissions decision as soon as possible. Take note that your TEAS test date must be within one year of the entry term. If admitted to Mercer University's College of Nursing, you will complete a comprehensive education that enables you to earn a Bachelor of Science in Nursing (BSN) degree in 12 months. Mercer is consistently ranked among the top 15% of colleges and universities nationwide by the Princeton Review, including recognition among "The Best 386 Colleges." ABSN Track Overview Mercer's ABSN track leverages your non-nursing bachelor's degree, so you can begin your nursing studies on the first day of class. It is a full-time, rigorous learning path that combines online coursework with hands-on labs and in-person clinical rotations. As a Mercer ABSN student, you will learn within a supportive environment that fosters academic excellence, innovative professional practice, social responsibility and service to others, and the promotion of health and quality of life. Online Coursework Mercer's online accelerated nursing coursework lays the groundwork for your education. These courses focus on the fundamentals and theories of professional practice, such as health assessment and pharmacology. These classes also set the stage for the hands-on skills you will develop during your nursing labs and clinical rotations. Nursing Labs Taking place at Mercer's ABSN Learning Site, nursing skills and simulation labs are the bridge between your online coursework and clinical rotations. Labs provide a contextual setting for you to develop your skills and clinical judgment without consequence. Through nursing labs, you will learn how to perform core clinical skills such as catheterization, nasogastric tube insertions, and wound care. You will also develop your critical thinking skills when participating in realistic clinical interventions that involve patient simulators. Clinical Rotations Clinical rotations provide you with real-world patient care experiences across the healthcare continuum. Taking place in healthcare facilities across the Atlanta metropolitan area, your clinicals will cover several practice areas, such as acute care, intensive care, adult health, pediatrics, and mental health. After earning your BSN from Mercer University, you will be prepared to sit for the National Council Licensure Examination for Registered Nurses (NCLEX-RN®) and enter the workforce as a practice-ready nurse. Ready to Begin the ABSN Admissions Process? If you have a non-nursing bachelor's degree with a minimum cumulative GPA of 3.0, begin your application for Mercer's 12-month ABSN track. An enrollment counselor is ready to support you every step of the way as you apply for a January, May, or August start date. Contact us today!
